

# Web Design Unit Number 2

Due February 3 and 4 2009

For this unit, you will be creating a new web page and saving it as a new .html file. **DO NOT** use the format from your first web page.

- Select a favorite food, celebrity, music, athlete or activity from your previous web page.
- Using the internet and what you already know, compile a list of facts about the topic.
- Once you have compiled facts, look for related links and images for your page.

Using what you know about HTML and web design, you are to construct a new web page about the topic you choose. This is not a “personal” page. This is an information page. Make sure you avoid using opinions on this page.

Here is a checklist of items the page must contain for a grade:

- At LEAST 2 links. (more for a higher grade)
- Background color
- 2 to 3 fonts
- Colored font
- Images

Be sure to include elements of design and layout. Consider whether or not your font color and background color go well together.

- Do NOT use a black background
- Do NOT use difficult to read fonts.
- Do NOT use fonts and BG colors that are too close together.
- Do NOT make this a personal page, it should be like an encyclopedia entry.
